

Porsche presents new-generation dashcam

24/11/2026 Porsche is expanding its range of accessories with the new Dashcam Gen. 2. The multi-camera system automatically records relevant driving and parking events, combining high-resolution footage with intelligent sensors.

Its discreet positioning allows the dashcam to blend harmoniously into the interior. Recordings and settings can be conveniently accessed and managed via the My Porsche app. The new dashcam is available to order now for all models via the Porsche Vehicle Accessories Finder and from Porsche Centres.

The Porsche Dashcam Gen. 2 is installed centrally beneath the rear-view mirror across the model range. Positioned outside the driver's field of vision, it integrates discreetly into the interior. The multi-camera system captures both the vehicle's surroundings and the interior in QHD resolution with HDR. An integrated polarising filter reduces distracting reflections from glass surfaces. This produces clear, detailed footage even in challenging lighting conditions or at higher speeds.

Automatic recording of relevant events

A G-sensor and radar detect relevant driving and parking events and automatically trigger a recording. Additional GPS information documents the car's location when recording begins. This ensures that important sequences are saved automatically. A 64 GB storage medium is included and can be expanded to up to 512 GB.

“The new dashcam combines discreet integration with intelligent recording technology. The result is a modern accessory that integrates into a Porsche both functionally and elegantly,” says Georg Kuhn, Director Product Development Accessories at Porsche.

Central control via the My Porsche app

The My Porsche app allows users to access recordings, review relevant events and adjust dashcam settings. The app integration therefore complements automatic event detection with a central control interface. The dashcam also bears the Porsche design signature and is deliberately timeless. An illuminated Porsche logo provides a distinctive brand accent while also indicating the camera's operating mode.

The Dashcam Gen. 2 can be used in all models equipped with the necessary camera preparation. A front camera is available for Cabriolet and Targa models, while both front and rear cameras are available for all other vehicles. The new Porsche dashcam can be ordered online via the Porsche Vehicle Accessories Finder or from a Porsche Centre. Installation is carried out locally at a Porsche Centre.
