No. 102/16

Porsche at the Los Angeles Auto Show 2016

World premiere of the Panamera Executive models and the 911 RSR

Stuttgart. At the Los Angeles Auto Show (November 18–27), Porsche is set to light the touch paper for the next stage of the Panamera. At the end of the year, four Executive models will celebrate their world premieres: the Panamera Turbo Executive (404 kW/550 hp), Panamera 4S Executive (324 kW/440 hp), Panamera 4 E-Hybrid Executive (340 kW/462 hp) and Panamera 4 Executive (243 kW/330 hp). One innovation is the basic engine of the four-door models. The fully redesigned 3.0-litre V6 turbo engine is the new entry-level model for the Gran Turismo class, and is used in the Panamera 4 Executive, the Panamera with rear-wheel drive and the Panamera 4 with all-wheel drive. Porsche will also unveil the 911 RSR racing car, yet another world innovation that will compete in the international arena in 2017.

The sportscar manufacturer will present the new, highly luxurious versions, with a wheelbase extended by 150 millimetres, at the Porsche press conference to be held in the Petree Hall at the Convention Center on November 16 at 10.15 a.m. (Pacific Standard Time; 7.15 p.m. CET).

The USA remains one of Porsche's main sales markets. Up to and including October 2016, the sportscar manufacturer delivered 178,314 vehicles around the world, representing a three-percent increase over the same period in the previous year. This success can be attributed to the excellent reputation the company enjoys among its customers: In 2016, Porsche once again triumphed in the overall classification of the renowned J.D. Power APEAL study conducted by the US market research institute J.D.

Power. In addition, the Porsche 911, Boxster and Macan achieved first place in their respective categories.
