

# Environmental and Energy Policy

## Dr. Ing. h.c. F. Porsche AG

### ENVIRONMENTAL AND ENERGY TARGETS

**We approach the future with confidence and unwavering consistency – our pioneering spirit *that also positively impacts the environment.***

We evaluate the environmental impact of our business activities and make every step quantifiable. We use this as a Framework to derive clear and objective-goals. We publish our key environmental and energy figures every year and *provide an update on the progress of our initiatives.* We are committed to the Paris Climate Agreement and focus our activities towards our goal to *limit the global warming.* We continuously *strive to reduce our environmental impact and improve our energy-related performance.*

### ENVIRONMENTAL PROTECTION

**We are committed to protect the Environment  
We work with passion to accomplish our goals .**

We are aware of the potential impact on the environment through the activities at our sites *and take continuous measures to conserve resources such as energy and water, reduce emissions, and promote biodiversity. High quality, and durability of our products are crucial parts of our identity along with our passion to protect the Environment.* We examine the environmental impact of our products *not only at the production level but also throughout their service life while also liaising with relevant interest groups in order to optimise our Processes and products to be both economically and ecologically sustainable.*

### MANAGEMENT BEHAVIOUR

**We are a family – we look after each other and take responsibility, which also includes our environment.**

Our managers are committed to environmental protection, by developing a *robust framework within their areas of expertise and implementing the principles defined in this policy. This encompasses ensuring that employees are qualified in their respective fields and demonstrate enthusiasm for environmental protection.*

### COMPLIANCE

**We are committed to excellence in performance  
while remaining fair at all times.**

We *adhere to legal requirements and other obligations while upholding our self-defined commitments. All employees and managers are encouraged to openly discuss environmental and energy topics.*
