

Environment

22/09/2026 With respect to the environment, Porsche focuses on the areas the company can directly influence: emissions, lifecycles and materials.

With respect to the environment, Porsche focuses on the areas the company can directly influence: emissions, lifecycles and materials. With technological strength and a willingness to innovate, we are shaping the mobility of tomorrow in a way that is both environmentally conscious and high performing.

To achieve this, Porsche wants to reduce CO_2 emissions along the value chain of its vehicles, using a flexible mix of drive systems that includes fully electric vehicles as well as efficient plug-in hybrids and emotional combustion engines. At the same time, the sports car manufacturer takes a holistic view of resources. Through long-lasting products, recycling processes and circular material use, Porsche aims to contribute to more sustainable solutions that can have an impact beyond the individual vehicle.
