

Transforming the Transportation Industry

This article reflects the status at the time of its publication. The content may since have become outdated.

17/11/2023 The human factor is key.

The transportation industry is a cornerstone of modern society, connecting people, businesses, and economies around the world. At the same time, the industry faces environmental challenges. Road transportation alone produces about one quarter of all greenhouse gas emissions. Fortunately, e-mobility and hydrogen are making great strides in replacing fossil fueled modes of transportation while developments in autonomous driving and artificial intelligence are unlocking untold possibilities in other areas. As a result, traditional transportation patterns are evolving to encompass entirely new platform solutions, which are on the verge of revolutionizing on-demand services and door-to-door transport.
