

Porsche extends electric sports car model range with the Taycan 4S

14/10/2019 It was only in September that the new electric sports car from Porsche celebrated its high-profile premiere on three continents simultaneously. Now, the company is already presenting the third version of the sports saloon with the Taycan 4S.

The new model is available with two battery sizes and delivers with the Performance battery up to 390 kW (530 PS; Electricity consumption combined 26.2 kWh/100 km; CO2 emissions combined 0 g/km (as of 08/2020)) or with the Performance battery Plus up to 420 kW (571 PS; Electricity consumption combined 27.0 kWh/100 km; CO2 emissions combined 0 g/km (as of 08/2020)). Following the Taycan Turbo S and the Taycan Turbo, the Taycan 4S is therefore the new entry-level model in the series. A single-deck Performance battery with a total capacity of 79.2 kWh comes as standard. The two-deck Performance battery Plus familiar from the Taycan Turbo S and Taycan Turbo is optionally available. The total capacity here is 93.4 kWh.

The power output and range therefore vary correspondingly: with the Performance battery, the Taycan 4S generates up to 390 kW (530 PS; Electricity consumption combined 26.2 kWh/100 km; CO2

emissions combined 0 g/km (as of 08/2020)) overboost power output. Equipped with the Performance battery Plus, it delivers up to 420 kW (571 PS; Electricity consumption combined 27.0 kWh/100 km; CO2 emissions combined 0 g/km (as of 08/2020)). In both variants, the Taycan 4S accelerates from a standing start to 100 km/h in 4.0 seconds. The top speed is also 250 km/h in both cases (Taycan 4S: Electricity consumption combined 27.0 – 26.2 kWh/100 km; CO2 emissions combined 0 g/km (as of 08/2020)). The range is up to 407 kilometres with the Performance battery and up to 463 kilometres with the Performance battery Plus (in accordance with WLTP in each case) – the highest value of the current Taycan range. The maximum charging capacity (peak) is 225 kW (Performance battery) or 270 kW (Performance battery Plus).

Innovative drive machines and dynamic performance

Breathtaking acceleration, tractive power typical of sports cars and outstanding continuously available power – the new model 4S also features these strengths of the Taycan. The permanently excited synchronous machine on the rear axle has an active length of 130 millimetres and is therefore exactly 80 millimetres shorter than the corresponding drive component on the Taycan Turbo S and Taycan Turbo. The pulse-controlled inverter used on the front axle in the Taycan 4S operates with up to 300 amps, and the inverter on the rear axle with up to 600 amps.

The new Taycan 4S on the street

With two permanently excited synchronous machines on the front and rear axles, in other words all-wheel drive, as well as a two-speed transmission on the rear axle, the drive architecture comprises the same main technical highlights as on its model brothers. The same also applies to the intelligent charging management and exemplary aerodynamics. With a cd value from 0.22, the aerodynamics makes a significant contribution to low energy consumption and thus long range. The clear, puristic exterior design with Porsche DNA is also typical for the Taycan, as is the unique interior design with wide display band.

Puristic exterior design with Porsche DNA

With its clear, puristic design, the Taycan signals the beginning of a new era. At the same time, it retains the unmistakable Porsche design DNA. From the front, it looks particularly wide and flat with highly contoured wings. The silhouette is shaped by the sporty roof line sloping downward to the rear. The highly sculpted side sections are also characteristic. The sleek cabin, the drawn-in rear C-pillar and the pronounced shoulders of the wings result in a sharply emphasised rear, typical of the brand. There are also innovative elements such as the glass-effect Porsche logo, which has been integrated into the light bar at the rear.

The exterior design of the new Taycan 4S

Distinguishing features of the Taycan 4S compared with the Turbo and Turbo S include the aerodynamically optimised 19-inch Taycan S Aero wheels and the red-painted brake callipers. The front apron with new geometry, side sills and rear diffuser in black ensure further visual differentiation. LED headlights including Porsche Dynamic Light System Plus (PDLS Plus) are equipped as standard.

Unique interior design with a wide display band

The cockpit also signals the start of a new era with its clear structure and completely new architecture. The free-standing, curved instrument cluster forms the highest point on the dashboard. This places a clear focus on the driver axis. A central 10.9-inch infotainment display and an optional passenger display are combined to form an integrated glass band in a black-panel look.

As standard, the Taycan 4S comes with a partial leather interior as well as front comfort seats with eight-way electrical adjustment.

With the Taycan, Porsche offers an entirely leather-free interior for the first time. Interiors made from innovative recycled materials underscore the sustainable concept of the electric sports car.

Centrally networked chassis systems

Porsche uses a centrally networked control system for the Taycan chassis. The integrated Porsche 4D Chassis Control analyses and synchronises all chassis systems in real time. As standard, the Taycan 4S features adaptive air suspension with three-chamber technology including electronic damper control PASM (Porsche Active Suspension Management).

The Taycan 4S has six-piston fixed-calliper brakes on the front axle with internally vented cast iron brake discs. The brake disc diameter is 360 millimetres on the front axle and 358 millimetres on the rear axle. Four-piston brakes are used on the rear axle. The brake callipers of the brake system are painted red.

The Taycan 4S can be ordered immediately and will arrive in European dealerships in January 2020.

Consumption data

Taycan Turbo (2023)

Fuel consumption / Emissions

WLTP*

Electric power consumption* combined (WLTP) 23.6 – 20.2 kWh/100 km
CO emissions* combined (WLTP) 0 g/km
CO2 class A Class

Taycan 4S (2023)

Fuel consumption / Emissions

WLTP*

Electric power consumption* combined (WLTP) 24.1 – 19.8 kWh/100 km
CO emissions* combined (WLTP) 0 g/km
CO2 class A Class

Taycan Turbo S (2023)

Fuel consumption / Emissions

WLTP*

Electric power consumption* combined (WLTP) 23.4 – 22.0 kWh/100 km
CO emissions* combined (WLTP) 0 g/km
CO2 class A Class

*Further information on the official fuel consumption and the official specific CO emissions of new passenger cars can be found in the "Leitfaden über den Kraftstoffverbrauch, die CO-Emissionen und den Stromverbrauch neuer Personenkraftwagen" (Fuel Consumption, COEmissions and Electricity Consumption Guide for New Passenger Cars), which is available free of charge at all sales outlets and from DAT (Deutsche Automobil Treuhand GmbH, Helmuth-Hirth-Str. 1, 73760 Ostfildern-Scharnhausen, www.dat.de).
