

Porsche LED headlight kits for select classic models now available in Canada

29/04/2025 New plug-and-play equipment allows easy retrofit with the latest, road-legal lighting technology.

Canadian drivers of select classic Porsche models are now able to retrofit their vehicles with the first and only road-legal LED headlights made by the sportscar manufacturer from Stuttgart.

The Porsche H4 and Porsche H7 LED are a plug-and-play LED retrofit option to the factory halogen lamps. Available for the 911 F model from 1972, the 911 G model, the 911 (type 964) as well as the 924 and 944 as H4 LEDs. Moreover, an H7 LED kit is offered for the 911 (type 996) and Boxster (type 986). These modern headlamps embody a symbiosis of elegant aesthetics and outstanding functionality.

The modern technology of the H4 and H7 LED headlights guarantees a longer service life of the lamps,

as well as a significant increase in visibility. The bright beam quality of the lamps ensures enhanced lighting at night as well as in adverse weather conditions.

The H4 and H7 LED kits can be ordered from Canadian Porsche Centres at a price of $299.
