

Disney+ now available in the Porsche Cayenne Electric and Macan Electric

24/04/2026 Porsche is further expanding its in-car entertainment offering globally by integrating the streaming service Disney+ into the new Cayenne Electric and Macan Electric. Customers with an active Disney+ subscription can now enjoy a wide range of films and series directly in their vehicle – including content from Disney, Pixar, Marvel, Star Wars and National Geographic.

Disney+ is available via the Porsche App Center, the central access point for third-party applications within the Porsche Communication Management (PCM). The app is fully integrated into the infotainment system, ensuring intuitive operation and a seamless digital experience.

Premium entertainment in the vehicle

Content is streamed via the high-resolution PCM displays. For safety reasons, playback on the central

display is available only when the vehicle is stationary – for example during charging stops, breaks or waiting times. With the optional passenger display, passengers can enjoy movies and series. A special screen technology ensures that the content is not visible to the driver, preventing distraction while driving. Bluetooth headphones can also be used for an individual viewing experience.

Disney+ subscribers have access to their personal profiles in the vehicle and can continue watching seamlessly from where they left off.

A wide range of content for all generations

The integration of Disney+ provides access to hundreds of films and thousands of television episodes, ranging from family favorites and iconic blockbusters to documentaries. Child profiles and age-appropriate content support a safe and family-friendly streaming experience, particularly on longer journeys.

A special highlight available to stream on Disney+ is Pixar's beloved animated classic Cars, which captivated audience when it released nearly 20 years ago. Featuring Sally Carrera, a Porsche character, the film creates a charming link between the Disney universe and the Porsche brand.

"By integrating Disney+, we are expanding our digital ecosystem with another high-quality entertainment offering. Customers benefit from a seamless in-car experience that fits naturally into everyday use – whether during charging stops or on longer journeys," says Sven Boehl, Senior Product Manager Porsche Connect.

Disney+ is now available in the new Porsche Cayenne Electric and Macan Electric. The integration will be rolled out to additional Porsche models as well in the next months.
