

Listicle: Porsche Taycan Turbo GT with Weissach package

16/06/2025 The Porsche Taycan Turbo GT is the most powerful and performance-focused Taycan to date.

The Porsche Taycan Turbo GT is the most powerful and performance-focused Taycan to date.

Designed for maximum agility and acceleration, it combines motorsport DNA with electric innovation and reaches new levels of dynamic capability with the optional Weissach Package.

What is it?

The Taycan Turbo GT is the most powerful production Porsche ever built. It pairs a high-performance electric drivetrain with motorsport-derived aerodynamics and lightweight construction.

With the optional Weissach Package, it's focused entirely on track performance removing the rear seats

and reducing weight by up to 75 kg.

What's new?

With up to 1,034 PS using Launch Control, the Taycan Turbo GT delivers explosive acceleration and sets new benchmarks.

Lightweight carbon components and enhanced aero increase downforce and sharpen performance.

Exterior

A fixed carbon rear wing, deeper splitter, and carbon side elements distinguish the Turbo GT with Weissach Package.

It rides on exclusive 21-inch forged wheels and features a more aggressive stance, designed for aerodynamic efficiency at high speeds.

Interior

The cabin features lightweight Race-Tex and leather, carbon fibre trim, and bucket seats.

In the Weissach version, rear seats are removed to save weight and reinforce the car's motorsport focus.

Drivetrain

Dual motors, all-wheel drive, and 800-volt architecture deliver up to 1,034PS.

The Taycan Turbo GT accelerates from 0–100 km/h in just 2.2 seconds (Weissach) and reaches a top speed of 305 km/h.

Stats

Performance: 0-100 km/h in 2.2 seconds (Weissach Package)

Top speed: 305 km/h

Range: Up to 555 km WLTP

Battery: 10-80% Charge: Approx 18 minutes using DC fast charger*

Driving experience

Every aspect of the Taycan Turbo GT's chassis and dynamics has been engineered for maximum engagement.

The Porsche Active Ride suspension system provides razor-sharp handling and adaptability, while Porsche Ceramic Composite Brakes (PCCB) offer fade-free stopping performance even in extreme conditions. Specially developed tyres provide exceptional grip, while a dedicated Attack Mode enables drivers to push the car to its limits.

A range of driving modes, including a dedicated track setting, allows drivers to extract the most from the car in any scenario.
