

Survey: Sustainability needs dialogue

This article reflects the status at the time of its publication. The content may since have become outdated.

22/05/2023 Environmental, Social and Governance – sustainable action has many facets. But what specific expectations do people around the world have of Porsche in this regard? On which topics does the company have the greatest influence and can make a significant contribution? To get answers, Porsche is launching an online stakeholder survey today, which will run until June 11.

Sustainability is a central aspect of Porsche's Strategy 2030. Porsche strives to fulfil its social responsibility with the aim of promoting sustainable and value-creating growth while at the same time further reducing its own environmental impact.

Porsche's business activities influence the lives and interests of many people. Porsche is therefore looking for a proactive and open exchange with its stakeholders and would like to continuously expand it.

Participate in the online questionnaire

The dialogue will focus on questions such as the following: What do people around the world specifically expect from Porsche in terms of sustainability? In which areas can Porsche make the greatest contribution from the point of view of its stakeholders?

You can help shape the further development of sustainability and sustainability reporting at Porsche by taking about ten minutes to fill out an online questionnaire.

The survey will run until June 11. You are welcome to share the link to the survey. Porsche is looking forward to your answer because sustainability needs dialogue.

Info

Participation is, of course, voluntary. Your data will be stored anonymously and strictly confidentially without attribution to the respondent and in compliance with all data protection regulations in accordance with the European General Data Protection Regulation (GDPR). For more information on data protection in this survey, please click here.
