

Cayenne S E-Hybrid is an environmental champion

This article reflects the status at the time of its publication. The content may since have become outdated.

25/01/2017 The most environmentally friendly vehicle in its class — the Cayenne S E-Hybrid has been awarded this title by the specialist magazine Auto Test and Ökotrend, an independent institute for environmental research.

The assessment considered the entire lifecycle of the vehicles tested, from production right through to recycling. This year, the Cayenne S E-Hybrid impressed the judges in the SUV category. The vehicle is the green champion for 2017, beating competition including the Mercedes GLE 500e and BMW X5 40e to receive the automotive environmental certificate.

Auto Test and Ökotrend have recognised the most environmentally friendly cars in all classes for over 20 years. In addition to noise and exhaust emissions, the key criteria are fuel consumption, production, purchasing, logistics and recycling. Awareness of ecological and social responsibility are also included in

the assessment.
