

No compromises for the 911 GT3

31/05/2017 The Porsche 911 GT3 offers everyday drivability and racing performance in equal measure. The heart of the high-performance sports car, which debuted at the Geneva Motor Show, is a flat-six engine (combined fuel consumption 12.9–12.7 l/100 km; CO2 emissions 290–288 g/km).

The flat-six engine was completely redesigned by Porsche Motorsport and is already in use in modified form in the 911 GT3 R, the 911 Cup, and the 911 RSR.
