

Rejuvenation treatment for used 911

15/10/2015 At this year's 20th anniversary of Porsche Tequipment, the retrofitting professionals are demonstrating the range of their expertise on a special project for a used 911 Carrera S Coupé.

The vehicle, initially equipped with not much more than the standard features, is upgraded with numerous options in the form of Tequipment retrofit components that transform it into an impressive top sports car – both visually and technically.

After being retrofitted with the Aerokit Cup, the exterior of the 911 Carrera S has an altered front end with modified spoiler lip and a fixed rear spoiler with an additional wing profile. The car's new look is completed by such features as black bi-xenon headlights and tail lights in a clear-glass look. The dual tailpipes made from polished stainless steel offer a hint at something that cannot be seen at first glance, but is certainly audible and palpable – the boost in engine power from 294 kW (400 hp, 911 Carrera S: Combined fuel consumption: 8.7-7.7 l/100 km; CO2 emissions 199-174 g/km) to 316kW (430 hp).

The vehicle's interior is also upgraded as part of the retrofit. The standard seats, for instance, are replaced by sport bucket seats with carbon shells. Also designed in carbon are the decorative trim strips of the dash panel and centre console. The motorsport ambience is complemented by Alcantara elements such as the Sport Design steering wheel and the PDK gear selector lever.

Porsche Tequipment offers a varied assortment

All it takes is a quick glance at the equipment list of the 'new' used Carrera S to see that the features just mentioned hardly exhaust the potential of the Tequipment product range.

Porsche Tequipment offers a varied assortment of accessories for aftermarket customisation of the various Porsche models. On the one hand, these accessories can improve product utility, as is the case with the model-specific cargo systems and child seats. On the other hand, equipment like sport exhaust systems, visual customisation options or complete wheel sets in independent designs can lift the emotions and driving pleasure. You can access information on Porsche Tequipment products with the online "Tequipment accessory finder" at www.porsche.com/tequipment. The search function of the online portal offers a quick and easy overview of the Porsche accessories programme in categories such as Exterior, Performance, Transport and protection, Wheels and wheel accessories – all made to fit the specific vehicle model.

The press release which you can find under Downloads will give you a comprehensive look at the retrofitting of the vehicle and background information on Tequipment options.
