

White Paper – Strategic Semiconductor Management

This article reflects the status at the time of its publication. The content may since have become outdated.

06/10/2022 From shortage to competitive advantage.

The semiconductor crisis poses unprecedented challenges for Original Equipment Manufacturers (OEMs). Current supply forecasts on the semiconductor world market show that the shortage will last until 2025. The automotive industry in particular is showing a significant capacity shortage for technology nodes >28 nm. The semiconductor crisis continues to be a major challenge and requires sustainable and crisis-proof solutions.

Strategic semiconductor management is crucial to prevent supply shortages and to leverage the innovative power of semiconductors. The white paper "Strategic Semiconductor Management" offers concrete recommendations for action to ensure supply security with semiconductors in the future and to achieve a competitive advantage even in times of crises.
