## Now available to order: new Cayenne S Coupé

Porsche is launching another powerful Cayenne Coupé variant: the vehicle is now available to order and will arrive at German dealerships at the end of July.

The 2.9-litre V6 engine featuring twin turbocharging and developing 324 kW (440 PS; Fuel consumption combined 9.4 – 9.2 l/100 km; CO2 emissions combined 216 – 212 g/km) is at the heart of the new Cayenne S Coupé. The maximum torque of 550 Nm guarantees powerful acceleration. The SUV coupé accelerates from a standing start to 100 km/h in 5.0 seconds in combination with the standard Sport Chrono Package. This figure drops to 4.9 seconds with the three optional lightweight sports packages. The top speed is 263 km/h.

In addition to the Sport Chrono Package, the standard equipment includes speed-sensitive Power Steering Plus, 20-inch alloy wheels, Park Assist at the front and rear including reversing camera and Porsche Active Suspension Management (PASM).
